

Guide for setting up a Mini HD camera (spy camera)

Congratulations on your new mini surveillance camera

Follow our Quick Start Guide for fast setup:

01) Download the "JXLCAM" App

ANDROID

IPHONE

02)

Open the JXLCAM app and click on "add camera"

03)

Select "AP add camera"

04)

Choose your home network by clicking on the "... " icon and add the network password

05)

Select "NEXT" and then "Connect camera hotspots" (remember to have the camera turned on - it should be blinking with a blue light, possibly click on the "Mode" button). The camera is now active in the JXLCAM app
